

Get Your Kubota Industrial Engine Application Up & Running In Minimal Time!

Controls Integration Controls & Harness Kits For Kubota T4F/StV Engines

- Complete solution
- Plug and play
- Customizable I/O
- Custom software available

The Controls Integration Kubota harness Kits are designed to be plug and play. Our complete kit connects the operator with a key switch and display to the Kubota engine ECU to the after treatment to the batteries. Everything to get your engine and application up and running in minimal time. You have the choice of an economical but crisp 3.8" QVGA monochrome Murphy V380 display or a full color high brightness 4.3" 16 bit WQVGA PV485 display.

Our harness kit consists of a main harness, power harness alternator and fuel pump harness and required after treatment harnesses. The harnesses are designed to fit your specific model of engine and most applications. For I/O intensive applications a customer interface harness and I/O expansion module is available.

Benefits:

- ▲ High quality harnesses that are tested per the Kubota requirements and fully validated
- ▲ Fully compliant with T4F/Stage V requirements
- ▲ Engine start/stop and throttle control via the display.
- ▲ Enhanced diagnostics (PV485 only)
- ▲ CAN 2.0B/J1939 and RS 485 communications
- ▲ Quality
- ▲ Experience
- ▲ Availability

Kubota T4F/STV engine	Murphy display	Controls Integration Kit
D1803, V2403	PV380	KT00017
	PV485	KT00021
V2607, V3307	PV380	KT00018
	PV485	KT00022
V3800 DOC, DOC+DPF	PV380	KT00019
	PV485	KT00023
V3800 SCR	PV380	KT00020
	PV485	KT00024

Custom Program The Display

Controls Integration can custom program the display to include branding screens with your logo, to custom machine specific service reminders all the way up to full control of actuators and valves integrated into the display. If you can dream it our engineers can make it a reality.
