

Get Your **FPT** Power Generation Engine Application Up & Running In Minimal Time!

Controls Integration Controls & Harness Kits For FPT T4F/StIV Engines

The Controls Integration harness kits for FPT generator applications are designed to be plug and play. Our complete kit connects the operator with a key switch and display to the FPT engine ECU to the after treatment to the batteries and your generator. Everything to get your engine and genset application up and running in minimal time.

Your choice of generator specific Deep Sea Electronics DSE4510 MkII or DSE6110 MkIII

Our harness kit consists of a main engine harness, power harness, required after treatment harnesses and the controls harness. The harnesses are designed to fit your specific model of engine and most applications. For I/O intensive applications an optional customer interface harness and I/O expansion module is available.

- Complete solution
- Plug and play
- Customizable I/O
- Custom software available

FPT Engines	Deep Sea Controller	Kit Number
N45/N67	DSE4510 MkII	KT00029
C87	DSE4510 MkII	KT00030
C13/C16	DSE4510 MkII	KT00031
N45/N67	DSE6110 MkIII	KT00049
C87	DSE6110 MkIII	KT00050
C13/C16	DSE6110 MkIII	KT00051
