

Get Your Kubota Power Generation Engine Application Up & Running In Minimal Time!

- Complete solution
- Plug and play
- Customizable I/O
- Custom software available

Controls Integration Controls & Harness Kits For Kubota T4F/StIV Engines

The Controls Integration Kubota Harness Kits for generator applications are designed to be plug and play. Our complete kit connects the operator with a key switch and display to the Kubota engine ECU, after-treatment, battery, etc. - everything to get your engine and genset application up and running in minimal time.

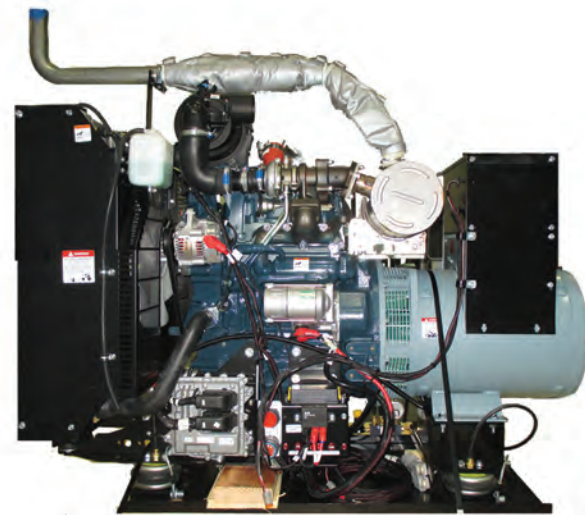

Your choice of generator specific Deep Sea Electronics DSE4510 MkII or DSE6110 MkIII

Our harness kit consists of a main engine harness, power harness, controls harness, and applicable generator harnesses. The harnesses are designed to fit your specific model of engine in most applications. For I/O intensive applications, optional customer interface harness and I/O expansion module is available.

Benefits:

- ▶ High quality harnesses that are tested per the Kubota requirements and fully validated
- ▶ Fully compliant with T4/StIV
- ▶ Engine auto start
- ▶ Engine Fault Code Monitoring
- ▶ CAN and generator parameter monitoring
- ▶ Quality
- ▶ Experience
- ▶ Availability
